

Sterostrip-Ultra

Ultra fine adhesive wound dressing, made from a film that conforms to the body like a second skin.

- Often referred to as a **“second-skin”** dressing because it is so thin, it’s virtually invisible
- A superb dressing chosen by surgeons following surgical procedures for improved patient comfort while allowing the individual to bath and shower
- Used in hospitals following surgery to cover and protect the wound site
- Sterile low adherent absorbent pad
- Allows skin to breathe
- Film coated with acrylic adhesive making it **hypoallergenic**
