

# ZOLL AED 3

For more than 30 years, ZOLL® has designed products that support first responders, medical personnel and everyday rescuers in times of crisis. The ZOLL AED 3® defibrillator, our newest model, builds on our reputation for providing rescuers with unrivaled real-time CPR feedback and a low total cost of ownership. ZOLL AED 3 embodies all the same great qualities as the ZOLL AED Plus® defibrillator, while offering advanced features such as full-color rescue images, integrated child mode, WiFi connectivity and RapidShock™ Analysis technology. RapidShock Analysis can analyse a patient's heart rhythm in three seconds, enabling delivery of the shock in as little as five seconds. Bystanders will be able to act quickly and confidently in a sudden cardiac arrest emergency.

The ZOLL AED 3® BLS model is designed for professional rescuers and includes advanced features including enhanced CPR feedback and CPR Dashboard™.

Category	Technology	ZOLL AED 3®	ZOLL AED 3® BLS	Defibtech Lifeline VIEW
AED	Integrated real-time CPR feedback	Yes, enhanced Real CPR Help® with: <ul style="list-style-type: none"> <li>• Colour compression depth bar gauge</li> <li>• Metronome</li> <li>• Voice and text prompts to guide the responder to perform high-quality CPR</li> <li>• CPR cycle timer</li> </ul>	Yes, enhanced Real CPR Help and CPR Dashboard™: <ul style="list-style-type: none"> <li>• Compression depth and rate displayed in realtime for both adult and paediatric/child modes</li> <li>• Real CPR Help in adult mode</li> <li>• Metronome</li> <li>• Voice and text prompts to guide the responder to perform high-quality CPR</li> <li>• CPR cycle timer</li> </ul>	No integrated real-time CPR feedback
	Instructive prompts	<ul style="list-style-type: none"> <li>• Full-colour display with vivid rescue images and instructive voice and text prompts guide the rescuer to the correct action</li> <li>• Paediatric-specific guidance in child/paediatric mode</li> </ul>	<ul style="list-style-type: none"> <li>• Full-colour display with vivid rescue images and instructive voice and text prompts guide the rescuer to the correct action</li> <li>• Paediatric-specific guidance in child/paediatric mode</li> </ul>	Instructive voice prompts and images guide through the rescue
