

Portable Eyewash Station Checklist

Weekly checklist

For workplace first aid products, visit steroplast.co.uk

Company name

Location

	Date	Date	Date	Date	Date	Date	Date	Date	Date	Date	Date	Date
Does the station have a minimum of 1L of eyewash solution?												
Are the eyewash bottles intact with unbroken seals?												
Are the eyewash bottles in date?												
Are the station and bottles free from dust and dirt?												
Is the station able to securely hold the eyewash bottles?												
Is the station well-lit?												
Is the station visibly signposted?												
Is the station free from obstructions?												

An emergency eyewash station weekly inspection checklist is necessary to ensure your eye first aid facilities are always in good working condition and ready to be used at all times. This checklist has been created in accordance with ANSI Z358.1-2014 guidelines.
